

## CALCULO DE ERROR

$$\text{Error } P\% = \left( \frac{\text{Valor Teorico} - \text{Valor Practico}}{\text{Valor Teorico}} \right) * 100$$

	Practico	Teórico
$V_{rms}$	4,837	4,86
$V_p$	6,87	6,85

$$\text{Error } V_{rms} = \left( \frac{4,86 - 4,837}{4,86} \right) * 100$$

$$\text{Error } V_{rms} = 0,473\%$$

$$\text{Error } V_p = \left( \frac{6.85 - 6.87}{6.85} \right) * 100$$

$$\text{Error } V_p = 0,292\%$$
